

This gift supports ELCA World Hunger.

To many of us in the United States, mosquitoes are nothing more than pests. But in many places around the world, just one bite from an infected mosquito can transmit malaria and lead to serious illness or death. A mosquito net, treated with long-lasting insecticide and accompanied with education on its proper use, can protect those most at risk — especially small children and older adults — from this life-threatening disease.

About your gift:

Shop ELCA Good Gifts and find 50 different ways to grow the church, fight hunger and transform lives.
